Meeting the needs of an ageing fleet and a growing NEV market

China's growing and ageing vehicle population is sustaining demand for repair and maintenance, while new energy vehicle (NEV) adoption is creating new requirements for equipment, components and technical expertise. The commercial vehicle sector is also evolving as carbon-reduction initiatives, growing production and sales, and overseas opportunities increase demand for cleaner, smarter and more efficient transport solutions.

Market at a glance

- 371 million cars in China as of June 2026¹
- 48.97 million NEVs in China as of June 2026¹

Responding to an evolving market

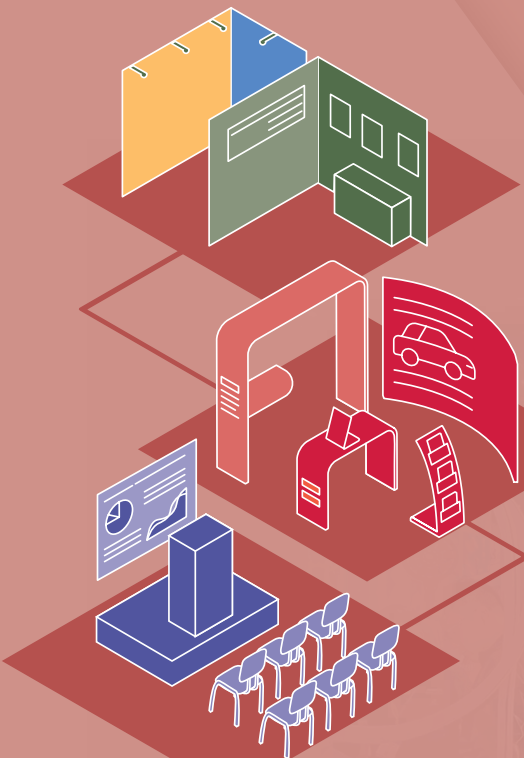

The Auto Maintenance & Repair Expo (AMR) 2027 will present repair and maintenance equipment, parts and core components for passenger vehicles and NEVs, providing a platform for technology application and commercialisation. Key topics and trends will also be addressed in conferences, training sessions and competitions which empower industry players to take advantage of this evolving landscape.

What to expect at AMR 2027

80,000 sqm
exhibition space

1,500+
exhibitors

50+
concurrent events

Advancing mobility

Explore opportunities created by electrification, intelligent connectivity and changing transport requirements

Commercial Vehicles & Transport Equipment

Twice the size of the previous edition, the zone will feature new energy commercial vehicles with different propulsion methods, including EVs, hybrid vehicles and more. It will also feature innovative applications of intelligent connectivity and assisted driving technologies in areas such as logistics, delivery, simulation, inspection and testing.

New Energy & Intelligent Connectivity

Including integrated systems compatible with various vehicle models, NEV components, charging and battery-swapping infrastructure, intelligent connectivity and autonomous driving applications, supported by themed conferences for OEMs, suppliers and end users.

Connecting the wider industry

Bringing together products, services and market players from across the automotive value chain

Accessories & Customising

This zone will cover car accessories, interior upgrades, exterior customisation and outdoor equipment. The Customising Culture & Trends Zone will complement the product displays with interactive activities for visitors.

Serving today's aftermarket

Explore solutions supporting the maintenance, repair and upgrading of China's existing vehicle fleet

Digitalised maintenance and repair

Solutions for more efficient, connected and sustainable service operations, including AI applications for workshops, mechanical and electrical diagnostics, NEV battery recycling, charging infrastructure maintenance, performance upgrades, and digital body and paint repair.

Parts & Components

Featuring replacement parts and advanced components for internal combustion engine (ICE) vehicles and NEVs, including thermal management, chassis and three-electric systems, lightweight components, and solutions for maintenance, performance and energy efficiency.

B1

- Workshop Equipment / Body & Paint / Tools
- The 4th Automobile Paint Finishing Vocational Skills Competition

B2

- Accessories & Customising
- Customising Culture & Trends Zone
- Automobile Wrapping Film Creative Skills Competition 2027
- Testing & Diagnostics / Tools / Car Wash & Care
- AMR Training Workshop

B3

- Parts & Components / New Energy & Connectivity
- Commercial Vehicles & Transport Equipment

A fringe programme built for the automotive service sector

Drawing on AMR's five key product clusters and international reach, the show combines timely market insights with technical seminars, hands-on training, skills competitions and business matching for professionals across the industry.

Market analysis

Experts and leading companies will dive into developments affecting the sector, including advancements in intelligent connectivity, new energy, smart logistics and electrified commercial vehicles to help professionals assess market changes and identify emerging opportunities.

Technical seminars

Covering areas such as NEV three-electric system maintenance, hybrid system diagnostics and AI-powered fault detection, the seminars will allow specialists to compare methods and share solutions to common technical challenges.

Hands-on training

The AMR Training Workshop Zone offers practical training and real-world case reviews in areas such as integrated diagnostics for NEV three-electric systems, new-material collision repair and automated ADAS calibration. Further sessions cover digital tools for managing workshop equipment, warehouses, deliveries, and vehicle movements, helping service outlets improve day-to-day operations.

Skills competitions

Competitions like The 4th Automotive Paint Finishing Vocational Skills Competition and Automobile Wrapping Film Creative Skills Competition 2027 provides a stage for technicians to compete alongside their peers, compare working methods and develop their skills through practical experience. Repair shops can draw on this knowledge to improve service quality, expand offerings and strengthen technical teams.

Business matching

Customised pre-show matchmaking and effective on-site networking connect exhibitors directly with global buyers to drive business opportunities. These targeted meetings enable local and overseas industry players to collaborate across key sectors, including intelligent connectivity, NEVs, aftermarket services, cross-border expansion, and global supply chains.

Trusted by leading brands across the industry

What to expect for 2027

Supported by Messe Frankfurt's sales network in 180 countries and regions and more than 50 international partners

Buyer delegation invitations sent to more than 20 countries and regions, including key markets in Central Asia, East Asia, Europe, Latin America, Middle East, North Africa, North America, Southeast Asia and more

Invitations to buyers and visitors through 40 mass and trade media outlets from China and overseas

Media coverage to spotlight industry developments

Collaborating with mainstream and trade media outlets, the show will highlight exhibitors' key products and features.

Social media maximises exposure to a wide audience

Through livestreams, short-form videos, and other content published on social media platforms, this promotional channel will amplify brand reach.

Connecting to international audiences through global media

In collaboration with overseas industry media, the show will share content to a global market.
