Capital International Exhibition & Convention Center, Beijing, 13 – 15 April 2026

## AMR 2026 focuses on digital solutions and new energy innovations shaping the future of maintenance services

**Beijing, February 2026. With intelligent technologies and new energy transforming the automotive industry, car owners demand more transparent, high-quality, and efficient maintenance and care. In response, innovations like remote monitoring, preventative diagnostics, electronic inspections, and automated maintenance are refining procedures, making aftermarket services more efficient, standardised, and digitalised. By highlighting these new technologies, the 74<sup>th</sup> edition of the Auto Maintenance and Repair Expo (AMR), scheduled for 13 to 15 April 2026 at the Capital International Exhibition and Convention Center, Beijing, enables maintenance workshops to widen their scopes and strengthen their capabilities.**

AMR is a key trade show for China's automotive aftermarket, serving as a gateway for trade, information exchange, and talent development, helping workshops identify opportunities and connecting these players with resources to enhance value. This edition will reflect digital and intelligent transformation through smart diagnostics solutions, internal combustion engine (ICE) vehicle and new energy vehicle (NEV) maintenance, car care, customising, and more.

### **Increasing efficiency and lowering costs of NEV repair**

With the impact of electrification, standardised NEV maintenance is essential in the aftermarket. For instance, data-driven technologies such as remote diagnostics and intelligent analysis facilitate a shift from reactive to proactive maintenance, while improving first-time fix rates. AMR will spotlight these technologies and solutions, addressing the NEV repair challenges arising from growing car ownership, technological advancements, safety concerns for high-voltage systems, and the need for battery inspections.

For example, debuting at the show, **Guheng Energy** will deliver diagnostics and testing systems for NEVs, focusing on batteries, motors, and electronic control systems. Designed for automated reporting across various vehicle models and integrated with cloud-based technologies for better efficiency, products include battery pack testers, air-tightness devices, high-voltage control systems, and inspection devices.

**Anche, AUTOOL, Cosber, Huayan, Unite, Uni-Trend** and **Xtool** will unveil NEV maintenance products, including high-voltage safety testing solutions, battery inspection and disassembly equipment, and analytics tools for electrical driving systems. Together, these equip workshops with comprehensive support for servicing NEVs and ensure more reliable procedures.

### **Supporting ICE within new business models**

Although maintenance practices are evolving to accommodate NEVs, ICE vehicle repair and maintenance remains a crucial revenue generator for workshops. Considering this, exhibitors

at AMR continue to showcase innovative equipment, advanced technologies and new service models for workshops catering to ICE vehicles.

Within this sector, **Beiqing Zhongyu** will present eco-friendly paint booths for refinishing damaged vehicles; **Bright, Dali,** and **Nexion** will feature lifting, alignment, and tyre care solutions; **Haide** will display ADAS calibration systems with precision sensors; and **Vulcan** will highlight welding and structural repair equipment for vehicle restorations.

Additionally, **Baoshun** and **CAR Manage** will showcase digital solutions, including repair processes for engines and electronics, project management tools, and smart marketing tools to optimise operations and customer conversion. Meanwhile, **Zoren** will bring core components for fuel, chassis, and electronics that boost repair speed and first-time fix rates.

### **Increasing importance of car washing, detailing, and customising**

More key revenue drivers for repair shops include washing, detailing, and customising, driven by demand for style, comfort, and personalisation. Highlighted exhibitors within this trending sector include **Goodyear's** EP series windshield wipers that ensure visibility during rain; **Haobang's** high-end seating suite; **Reflek's** advanced window films with superior heat reflection and UV blocking; and **SENKIA Technology's** engine maintenance products, fuel additives, and air conditioning care solutions.

### **Creating an integrated industry ecosystem through diverse fringe events**

As technological innovation and talent development reshape the aftermarket, collaboration and education are crucial. The **Maintenance and Repair Workshop Series** addresses this through interactive sessions emphasising NEVs, digital and intelligent repair and maintenance, sheet metal painting, commercial vehicle maintenance, and used car restorations. Notably, **DeepNeuro Assess**, a digital solutions provider, will showcase the shift from an experience-based to a data-driven approach through AI-powered smart diagnostics systems for data analysis. The systems empower mechanics by enabling real-time collaboration between technicians, AI systems, and experts through remote consultations.

In addition, as restoration emerges as a new specialty in automotive maintenance, workshops require standardised restoration practices. Under the workshop series, demonstrations will focus on recovering exterior and interior components, inspections of structural integrity, power and electrical systems, and quality checks. Sessions such as this aim to enhance efficiency by encouraging service centres to develop consistent processes.

To further support maintenance shops, a range of skills competitions will offer opportunities for upskilling and business expansion. Notably, the **National Vocational Skills Competition (Paint Finishing)** will feature dent repairing, paint refinishing, and data restoration.

Meanwhile, the **National Creative Film Application Skills Contest** will underscore trends driven by the rising popularity of NEVs among younger consumers, creating new opportunities in decoration, renovation, and customisation.

Also responding to market demand, the **China Automotive Aftermarket Conference** will gather experts and organisations from the global and domestic aftermarket to explore worldwide developments and in turn, foster international cooperation. Here, consultants from developed markets like Europe and the US will share insights on advanced systems and technologies. The conference will also provide growth opportunities and explore prospects in emerging markets such as Africa, the Middle East, Southeast Asia, and more.

The Auto Maintenance and Repair Expo (AMR) is co-organised by China Automotive Maintenance Equipment Industry Association (CAMEIA), China Automotive Maintenance and Repair Association (CAMRA), Messe Frankfurt (Shanghai) Co Ltd and China National Machinery Industry International Co Ltd (Sinomachint). The fair is one of the some 40 global events under Messe Frankfurt's Mobility and Logistics sector.

**Background information on Messe Frankfurt**

The Messe Frankfurt Group is the world's largest trade fair, congress and event organiser with its own exhibition grounds. With a workforce of some 2,700\* people at its headquarters in Frankfurt am Main and in 29 subsidiaries, it organises events around the world. Group sales in financial year 2025 were around € 766\* million. We serve our customers' business interests efficiently within the framework of our Fairs & Events, Locations and Services business fields. One of Messe Frankfurt's key strengths is its powerful and closely knit global sales network, which covers around 180 countries in all regions of the world. Our comprehensive range of services – both onsite and online – ensures that customers worldwide enjoy consistently high quality and flexibility when planning, organising and running their events. We are using our digital expertise to develop new business models. The wide range of services includes renting exhibition grounds, trade fair construction and marketing, personnel and food services.

Sustainability is a central pillar of our corporate strategy. Here, we strike a healthy balance between ecological and economic interests, social responsibility and diversity.

For more information, please visit our website at: [www.messefrankfurt.com/sustainability](http://www.messefrankfurt.com/sustainability)

With its headquarters in Frankfurt am Main, the company is owned by the City of Frankfurt (60 percent) and the State of Hesse (40 percent).

### **Background information on Sinomachint**

China National Machinery Industry International Co., Ltd. (SINOMACHINT) represents a subsidiary of China National Machinery Industry Corporation, a centrally administered conglomerate on the Fortune Global 500 list. It stays committed to creating an integrated platform for technical exchange and trade promotion between Chinese and foreign businesses. And it has now built well-known exhibition brands – CIMT, CMECEXPO, and CNMTC – in a way to deliver a full range of convention and exhibition services that it focuses on, from event organization to operation. A parent company of more than 20 investment enterprises, SINOMACHINT holds over 50 self-organized exhibitions domestically and nearly 20 overseas, while acting as the agent of about 200 foreign trade shows. In 2020, SINOMACHINT ranked first in the total number and area of exhibitions hosted on the mainland, according to statistics from the China Council for the Promotion of International Trade. And its position as China's largest agent of overseas expos has for years stayed unchanged. As always, SINOMACHINT will remain a responsible innovator that values collaboration and shares benefits. That means it promises to spearhead the development of China's convention and exhibition industry and grow the Chinese business community for shaping the new dual-circulation development pattern. It stands ready to work more closely with all sectors of society for greater innovation, for more win-win scenarios, and for a thriving economy in China and beyond.
