Capital International Exhibition & Convention Center, Beijing, 13 – 15 April 2026

## AMR 2026 to widen coverage at commercial vehicle zone, supporting industry in the adoption of new technologies

**Beijing, 2 April 2026. As a comprehensive platform for the automotive aftermarket, the 74<sup>th</sup> edition of Auto Maintenance and Repair Expo (AMR) will combine trade, information exchange, and talent development across 80,000 sqm of the Capital International Exhibition & Convention Center from 13 to 15 April 2026. More than 1,350 exhibitors will showcase advanced products and solutions to help upgrade workshop and service capabilities. As trends of digitalisation and new energy commercial vehicles reshape both the wider industry and the commercial vehicle sector, targeted solutions are required within the mobility and logistics sector. To address these challenges, the show will feature an expanded Commercial Vehicle & Road Transport Equipment Zone, delivering an efficient forum for collaboration and knowledge exchange alongside product showcases.**

As one of China's more influential automotive trade exhibitions, AMR has been leveraging its influence in the Northern region of the country and extending it to the entire market. Being a major part of the nation's economy, the mobility and logistics sector plays a vital role in driving economic growth and maintaining supply chains. Consequently, demand for commercial vehicles has grown, particularly for inter-city transportation and "last-mile delivery" services, that move goods directly from distribution hubs to customers. For fleets and logistics operators, a strong aftermarket network of services, parts and components is essential for reducing costs and improving efficiency, whilst ensuring the safety of drivers, vehicles and cargo. In response to such demand from the industry, AMR 2026 will feature a wider range of exhibitors and a list of fringe events that spans from skills contests and professional forums to create a platform that serves the wider industry.

### **Constructing the future blueprint for the road transport ecosystem**

Reflecting these changes, the expanded Commercial Vehicle and Road Transport Equipment Zone will utilise a new model that combines exhibition, forum, and competition areas into one. Through this model, the zone will showcase advancements such as intelligent transportation, driving the future of the mobility and logistics sector.

The **exhibition area** will include driving simulators, smart logistics equipment, leading commercial vehicle models, vehicle inspection equipment, and related products for smart transportation systems, and more. Among these, **NEOLIX** will debut its L4 autonomous delivery vehicle that demonstrate the powerful impact of intelligent technologies on the road transport network.

On top of this, the **forum area** will converge representatives from leading organisations and companies such as Anhui Sanlian University, China Communications Press Co Ltd, Driver Training Branch of China Communications and Transportation Association, Eastern Pioneer

Driving School, and more. These players will share insights on the integration of simulators in driver education and its role in ensuring road safety, among other topics. In addition, leading technological innovators such as PonyAI, NEOLIX, KargoBot, StarCharge, and more will delve into how similar technologies can be utilised in the intelligent logistics ecosystem. Within it, Didi and the Research Institute of Highway from the Ministry of Transport will share further insights on vehicle-road coordination and intelligent transportation.

Concurrently, the **competition area** will feature several driving simulators, allowing visitors to experience this technology first-hand. Sanlian Traffic Technologies will also host the **Ultimate Drive: Full Region Racing Challenge**, simulating complex and otherwise unsafe road conditions to sharpen professional drivers' skills and highlighting how high-quality driver training builds emergency response capabilities and maintains operational safety.

One of the highlights of this edition is the “**Leading Road Transport Vehicle Evaluation**”, aiming to set benchmarks for the commercial vehicle sector. This event will have leading industry organisations explaining the latest standards in areas like safety, efficiency, economic feasibility, comfort and level of intelligence, accompanied by demonstrations of the evaluation process and a showcase of various commercial vehicle models.

#### **Converging leaders from all sectors to strengthen supply chain agility**

This edition will feature a line-up of exhibitors showcasing the latest developments in parts, components and maintenance equipment, covering powertrain systems, chassis components, and key parts for new energy commercial vehicles, all of which are crucial in building a reliable logistics and transportation ecosystem.

Among them, **Wonder Halla** will spotlight its generators and starter motors for passenger vehicles, commercial vehicles and construction machinery, which are known for their durability and steady output, and **Ironstamp** will bring their NEV air conditioning and suspension system compatible for various models, responding to the rising demand for comfort and vehicle stability. Elsewhere, **Yuhuan Xinkai** will showcase high-precision wheel and balance shafts, as well as reliable transmission parts for a long-lasting powertrain. In addition, **Zoren** will feature fuel pump assemblies and pumps for air suspension systems, helping maintenance shops increase service quality and consistency.

Meanwhile, exhibitors like **Add Industry, ChaoSheng Autoparts, FKG Bearings, Gold Phoenix, Jinli, Longzhong Holdings, ODM Transmission, Renfeng, Runhope, Shengbao Road, Yasid Auto Parts** and more will be exhibiting their parts and components, alongside related products at the show.

#### **High-caliber buyer groups to participate at the show**

Building on this focus, AMR will host leading companies and professional organisations to construct a platform for industry exchange. For example, the **Xinjiang Road Transport Association, Liaoning Road Transport Association and Xinjiang Automotive Aftermarket Chamber of Commerce** will form buyer groups consisting of participants from across the value chain, such as logistics service providers, transport companies and parts distributors. To facilitate collaboration between exhibitors and buyers, business matching events will be held during the exhibition, promoting the development of the industry while supporting the implementation of new technologies and products.

The Auto Maintenance and Repair Expo (AMR) is co-organised by China Automotive Maintenance Equipment Industry Association (CAMEIA), China Automotive Maintenance and Repair Association (CAMRA), Messe Frankfurt (Shanghai) Co Ltd and China National Machinery Industry International Co Ltd (Sinomachint). The fair is one of the some 40 global events under Messe Frankfurt's Mobility and Logistics sector.

**Background information on Messe Frankfurt**

The Messe Frankfurt Group is the world's largest trade fair, congress and event organiser with its own exhibition grounds. With a workforce of some 2,700\* people at its headquarters in Frankfurt am Main and in 29 subsidiaries, it organises events around the world. Group sales in financial year 2025 were around € 766\* million. We serve our customers' business interests efficiently within the framework of our Fairs & Events, Locations and Services business fields. One of Messe Frankfurt's key strengths is its powerful and closely knit global sales network, which covers around 180 countries in all regions of the world. Our comprehensive range of services – both onsite and online – ensures that customers worldwide enjoy consistently high quality and flexibility when planning, organising and running their events. We are using our digital expertise to develop new business models. The wide range of services includes renting exhibition grounds, trade fair construction and marketing, personnel and food services.

Sustainability is a central pillar of our corporate strategy. Here, we strike a healthy balance between ecological and economic interests, social responsibility and diversity.

For more information, please visit our website at: [www.messefrankfurt.com/sustainability](http://www.messefrankfurt.com/sustainability)

With its headquarters in Frankfurt am Main, the company is owned by the City of Frankfurt (60 percent) and the State of Hesse (40 percent).

### **Background information on Sinomachint**

China National Machinery Industry International Co., Ltd. (SINOMACHINT) represents a subsidiary of China National Machinery Industry Corporation, a centrally administered conglomerate on the Fortune Global 500 list. It stays committed to creating an integrated platform for technical exchange and trade promotion between Chinese and foreign businesses. And it has now built well-known exhibition brands – CIMT, CMECEXPO, and CNMTC – in a way to deliver a full range of convention and exhibition services that it focuses on, from event organization to operation. A parent company of more than 20 investment enterprises, SINOMACHINT holds over 50 self-organized exhibitions domestically and nearly 20 overseas, while acting as the agent of about 200 foreign trade shows. In 2020, SINOMACHINT ranked first in the total number and area of exhibitions hosted on the mainland, according to statistics from the China Council for the Promotion of International Trade. And its position as China's largest agent of overseas expos has for years stayed unchanged. As always, SINOMACHINT will remain a responsible innovator that values collaboration and shares benefits. That means it promises to spearhead the development of China's convention and exhibition industry and grow the Chinese business community for shaping the new dual-circulation development pattern. It stands ready to work more closely with all sectors of society for greater innovation, for more win-win scenarios, and for a thriving economy in China and beyond.
